LOVE IN WHITE

AN ALL-WHITE WEDDING INSPIRED BY THE BRIDE'S FAVORITE COLOR AND MODERN AESTHETIC

Having an all-white wedding was very important to Susana so she commissioned the talents of Soraya Belgacem of SYB Event Planning to make her wedding dreams come true. "The bride loved white, greenery, and candlelight. I added touches of blush and gold accents to round out the design," Belgacem described. The couple recited their vows under a breathtaking canopy of greenery and white hanging flowers. After the ceremony, the

head table was placed under the floral installation, creating a magical setting for dinner. Each table was beautifully decorated with a mix of high and low floral arrangements. Pops of champagne and gold were integrated into the design through modern place settings and candelabras. The night concluded with dinner and a magnificent cake that was topped with an edible castle as a subtle nod to their fairytale wedding and their venue.
